REMARKS

The applicants respectfully disagree.

The NOTICE TO COMPLY states that the application does not contain a "Sequence Listing" for a nucleotide sequence and/or an amino acid sequence.

The applicants agree the specification does not contain a "Sequence Listing" for a nucleotide sequence and/or an amino acid sequence.

However, the applicants respectfully note that the present application does not concern a "Sequence Listing" but rather concerns a diversity transmitting/receiving apparatus and method. Therefore, the applicants respectfully disagree that a "Sequence Listing" is required.

Accordingly, the applicants respectfully request that this NOTICE TO COMPLY requirement for a non-existent and non-required "Sequence Listing" be withdrawn.

Should the USPTO have any remaining questions or concerns, the USPTO is encouraged to contact the undersigned attorney by telephone to expeditiously resolve such concerns.

Respectfully submitted,

Dated: AUGUST 11, 2008
